

**CARESCAPE Monitor B850**  
Connecting intelligence and care.

A high level of monitoring excellence.

# A consistent level of care.

The CARESCAPE\* Monitor B850 is a fully modular and flexible monitor with clinical tools ready to meet even the highest acuity patient needs. It allows the most optimum and ergonomic design to match the specific needs of high-acuity care areas such as ICU or cardiac surgery.

**See more. Do more.** Vital signs. Critical alarms. Patient's electronic record. And the ability to access it all in moments. All of this information is delivered in an intuitive, easy-to-use Linux\*\*-powered user interface resulting in fast and quick analysis.

# Intelligence that fits your workflow.

The CARESCAPE Monitor B850 is the flagship of a comprehensive platform of modular monitors that work together across the hospital for reliable data continuity to support care area workflow.

As part of a scalable system, the CARESCAPE Monitor B850 is designed to leverage the networks you already use while enabling cost-effective access to technology that will support quality outcomes in the future.

**Seamless data flow** lets you view data via integrated Citrix\*\* thin client and reports directly into HIS/EMR through the CARESCAPE Gateway. Even when you're off-site, remote access to labs, X-rays, charting, and other data via mobile devices lets you stay close to your patients and enables rapid, informed decision-making.

## The advanced clinical intelligence you need, with technology you can trust.

The comprehensive set of parameter options includes continuous metabolics and gas exchange and recognized technology integration such as PiCCO. It also supports cardiac diagnostic excellence with the GE EK-Pro arrhythmia algorithm and two-way communication with the MUSE\* ECG management system, providing ECG serial comparison capability.

**Customizable alarms** help you respond to patient-specific conditions and may help you reduce the nuisance effect.

## About GE Healthcare

GE Healthcare provides transformational medical technologies and services that are shaping a new age of patient care. Our broad expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, biopharmaceutical manufacturing technologies, performance improvement and performance solutions services help our customers to deliver better care to more people around the world at a lower cost. In addition, we partner with healthcare leaders, striving to leverage the global policy change necessary to implement a successful shift to sustainable healthcare systems.

Our “healthymagination” vision for the future invites the world to join us on our journey as we continuously develop innovations focused on reducing costs, increasing access and improving quality around the world. Headquartered in the United Kingdom, GE Healthcare is a unit of General Electric Company (NYSE: GE). Worldwide, GE Healthcare employees are committed to serving healthcare professionals and their patients in more than 100 countries.
